Baton Rouge, LA 70802

Louisiana Ethics Administration Program,

I am writing you to request an advisory opinion about my status as a member on the Capital Area Groundwater Conservation Commission.

I was appointed to the CAGWCC earlier this year by the Governor. I was nominated by the West Baton Rouge Parish Council and I am their representative on the commission.

I work for Placid Refining Company located in WBR Parish. I am a Chemical Engineer and oversee various process units.

Placid does not have a groundwater well. Also, Placid is not directly regulated by the commission to my knowledge. Placid does, however, purchase water from WBR's Municipal Water division.

Please contact me if the need arises for me to answer any additional questions or provide more information.

Thanks,

Unknown @Port 9100
